FA: Fred Beckey, Scott Davis, Al Givler; 1967
FFA: Don McPherson, Richard Suddaby; 1983
Re-cleaned: Jeremy Frimer & friends; 2007, 2011

All anchors bolted, rap-equipped. Can escape from any pitch with one 60m rope.

Note: pitches 3-5 are wet until late June.

Gear: doubles to 2", singles to 4". (If doing the What's Left variation to pitch 6, bring 5"-6" gear.)

Pitch 1-2: .8. .7, 75m together. Climb *Eagle's Domain*—a splitter finger crack on a slab—for 60m, then move right on a ramp to belay at the base of a corner.

Pitch 3: 10c, 12m, 4 bolts. Face climb (crux at third bolt) to reach **Political Ledge**.

Pitch 4: 10b, 20m. Jam, stem, and layback the *Filibuster*. Most of the gear is in a face crack on the left wall. If you have the gear and the guts, link pitches 4-5 at 10d.

Pitch 5: 10c, 25m, 1 bolt. More *Filibuster*. Layback and jam a steep corner hand crack, pull through a crux bulge, then endure the pump layback on excellent finger locks.

Pitch 6 right var.: 10c, 25m. At the base of the steep wall, stem until it's possible to move right past a pin into a steep finger crack. Handrail right to the top.

Pitch 6 left var.: 10d, 25m. *What's Left*. Jam a widening corner, pull over a huge flake (5-6" gear needed), then monkey to the top.

Descent: walk off (10 mins)
